ABOUT

They're Good Dogs Brent is a quote from Twitter account @dog_rates during a celebrated exchange in which the account shut down a person taking issue with their rating system.

The Twitter account We Rate Dogs (@dog_rates) is devoted to humorously reviewing pictures of dogs doing adorable poses, often giving them scores above 10/10. It has acquired more than 7 million followers since its debut. On September 12th, 2016, Twitter user @brant took issue with the account's rating system, tweeting @dog_rates to tell them it didn't make any sense. @dog_rates replied with "they're good dogs Brent," purposefully misspelling @brant's name.

So what does this ratings do? I was able to carry out a personal analysis of tweets in the dataframe like;
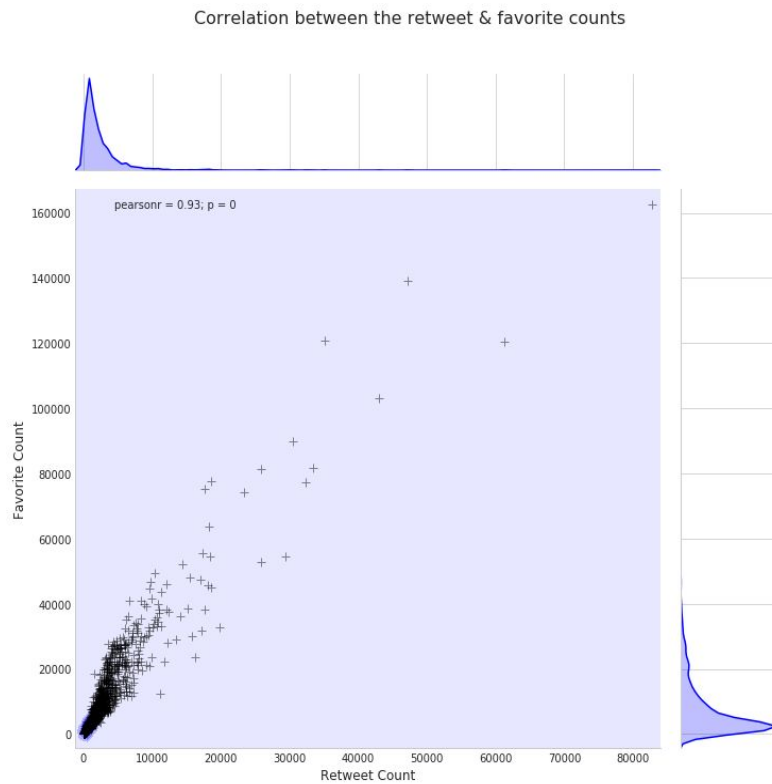

- **What is the most source of tweets?** Most tweets are from and iphone on WeRateDogs as shown below.

- **The actual maximum and minimum favorite tweets** this picture represents the least favorite tweets that is to say the least liked dog

- **The Correlation between retweet and favorite count** This proofs how closely related these tweets are

Correlation between the retweet & favorite counts

It was interesting th know that the least and most liked photo/tweets are till the least most retweeted tweets from the WeRateDogs.
